WR Lift is a leading manufacturer of high-quality Personnel and Material Hoist Elevator and MCWP designed for the construction and industrial sectors. With a commitment to innovation, safety, and efficiency, we provide tailored solutions that meet the diverse needs of our clients worldwide. Our team of experts is dedicated to delivering advanced technology and reliable systems that enhance productivity, while ensuring maximum safety on every job site.

At WR Lift, we are more than just a product provider – we are a partner in helping our customers succeed by elevating their work to new heights. Through our cutting-edge engineering, exceptional customer service, and unwavering focus on safety and quality, we strive to set new industry standards and become a trusted name across the globe.

#### EXPORT PRODUCTS:

Material & Personnel Hoist Elevator, Mast Climbing Work Platform, Boom Scissor Lifts, Tower Crane, Automatic Car Parking System, Suspended Platform, Building Maintenance Unit (BMU), Spare Parts

In Bursa Asteknik A.S has served in infrastructure market since 1976 and entered to valve manufacturing business by producing the first Asteknik brand butterfly valve in 1988. At the present time besides butterfly valves, check valves, dismantling joints, knife gate valves, needle valves and elastomer gaskets are in the product portfolio between the dimensions of DN25-DN3000 and pressure ratings of PN 6-10-16-25-40-63 with different material alternatives. All these valves are produced in factory located in Bursa in 13000 m2 closed area.

1976 First started its journey with project designing  
1980 Wholesaling to the construction and armature markets  
1985 First butterfly valve production in Bursa  
1997 New factory in M.K.Pasa-Bursa with 2500 m2 closed area  
2000 Growth in sales and production  
2003 New production area with 5000m2 closed area  
2008 Total 8000m2 production area.  
2010 New production area for big valves with 5000 m2closed area.

**EXPORT PRODUCTS:**

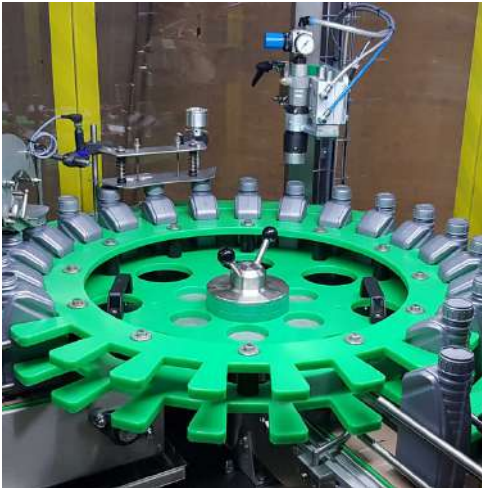

Butterfly Valve, Check Valve, Needle Valve, Knife Gate Valve, Dismantling Joint, Elastomer Gasket

Aymaksan Ayla Makina Sanayi A.Ş. has manufacturing programs consist of packaging and process machines used in operations such as package feeding, cleaning, filling, capping, and labelling. We design our machines to meet our customers' specific needs; starting from creating three-dimensional models to manufacturing and programming, we handle everything in-house. The best indicator of our customer satisfaction is that our average sales per customer exceed 3,5 machines per customer. For our company, the sales process extends to include the provision of spare parts and technical service support after-sales. We believe that meeting our customers' demands requires knowledge and experience, cultivated through a collaborative and creative team with a strong sense of unity. Therefore, we invest in both professional and personal development training to enhance the skills of our employees in all aspects of their careers and personal growth. Providing high-tech machines under optimal conditions and offering accurate guidance for our customers' investments are among our fundamental principles. We showcase our machines at both domestic and international fairs. Over time, we have consistently exhibited at various fairs including the Istanbul Packaging Fairs, Paint and Chemical Fairs, Food Packaging Fairs, Düsseldorf Interpack, the biennial Paris Salon de l'Emballage, and Turkish Export Products fairs organized by ITO/İGEME/special fair organizations. Our company is a member of the ASD (Packaging Manufacturers Association), a founding member of the AMD (Packaging Machinery Manufacturers Association), and a founding partner of OSO AŞ (Common Purchasing Organization Inc.), established under the umbrella of OİAİB.

**EXPORT PRODUCTS:**

Filling Machines, Capping Machines, Labeling Machines, Package Cleaning, Package Feeding Machines, Case Packer, Palletizing, Streching Machines.

Our company, which began operations in Ankara in 1985, has become one of the leading companies in its sector worldwide today, thanks to nearly half a century of experience and the strength and trust we have gained from you. What started as a passion for industry in a small workshop has grown into an enterprise with over 500 employees, production facilities exceeding 100,000 square meters, regional offices in Ankara, Istanbul, the Aegean, and South Anatolia, and sales and service centers in Duisburg and Mannheim (Germany), Salzburg (Austria), Sisseln (Switzerland), and Chicago (USA). Alongside numerous domestic and international distributors in over 30 countries, an extensive after-sales service network, and partnerships with global brands in the sector, we are undoubtedly the largest in the Turkish crane sector and one of the largest globally in terms of scale and product range diversity. Today, we take pride in both the cranes operating across every corner of Turkey and the strength of our exports, which have reached over 90 countries across six continents. In 2023, we became the first and only publicly traded crane manufacturer on the Istanbul Stock Exchange through our public offering. With this milestone, we not only increased our transparency and financial strength but also embraced the expectations and responsibilities of our domestic and international shareholders. Since our establishment, our fundamental principle has been to provide services with a commitment to "SUPERIOR QUALITY" and "EXCEPTIONAL SERVICE," always prioritizing customer satisfaction. The quality of all the cranes and custom-designed machinery we manufacture is certified by internationally respected organizations, undergoing rigorous inspections and holding globally recognized certifications.

**EXPORT PRODUCTS:**

Travelling Cranes, Gantry Cranes, Process Cranes, Lifting Groups, Jib Cranes, Port Cranes, Special Manufacturing, Crane Equipment.

GEO Drilling Machinery Ltd. was established in 2010 to transform the experiences we gained from the application, use, maintenance, improvement, and reinforcement of drill rigs and equipment used in Ortadoğu Drilling Inc. into production. Our goal is to meet the needs of the drilling industry more economically, innovatively, efficiently, and in a shorter time by making our research and development studies more effective.

After our company was established, significant progress was made, leading to the production of various drill rigs such as GEO 500, GEO 900, GEO 900-E, GEO 1500, and GEO 2000, along with 535 and 835 water pumps, and other drilling equipment. GEO Drilling Machinery Ltd. makes innovative and customized designs while producing these drill rigs. The company benefited from the support program in the following projects carried out within the scope of Technology and Innovative Support Programs Directorate (TEYDEB) of Tubitak (Scientific and Technological Research Council of Türkiye).

- Hydraulic Core Crawler Drilling Machine Development Project No. 7110412 (1.07.2011 - 30.06.2012)
- Electrically Stimulated Hydraulic Drilling Machine Development Project No. 7120574 (1.07.2012 - 30.06.2013)
- 7120574 Electrically Stimulated Hydraulic Drilling Machine Development Project (1.07.2012 - 30.06.2013)

**EXPORT PRODUCTS:**

Drill Rigs, Wireline Coring System, Drill Rod & Casing, Drill Bit & Reaming Shell.

The wall between art and engineering is only in our minds.

We started our journey in 1998 to provide the integration of engineering with art; industry with nature; plant with environment; and technology with life. To understand, develop, direct the motion, as well as to make efforts to bring it under control by taking inspiration from the motion's nature have become our purpose of foundation.

As an umbrella organization of partner firms specialized in their field of operation that are compatible with our engineering infrastructure, we combine expertise in great projects. Specialized in different motion and control technologies and engaged in multidisciplinary engineering solutions that are held up as an example, we keep on manufacturing in an attempt to become a global center for control technologies of industrial motion.

#### EXPORT PRODUCTS:

Robotics Systems, Automation Products, Mechanical Products, Hydromechanics Systems, Hydraulic Automation, Automation Panels, SVP Applications, Hydraulic Cylinders, Valve Control Blocks, Hydraulic Power Units, Test Systems, Filtration & Circulation Groups, Battery - Nitrogen Stands, Load Platforms, Special Hydraulic Presses

Our company is the largest manufacturer of hydraulic and pneumatic cylinders in Turkey, capable of producing the largest product dimensions. We have the capacity to hone cylinders with a 3m bore and a 23m stroke, and all end-to-end production processes, except for heat treatment, are performed in-house. Our facility spans 43,000m<sup>2</sup>, of which 26,000m<sup>2</sup> is enclosed. We currently employ over 200 people and export more than 80% of our products, primarily to European countries such as Austria, Germany, and France. We have been the leading exporter of heavy-duty hydraulic cylinders in Turkey for many years. Since 2000, we have focused solely on hydraulic cylinder production and have placed a strong emphasis on quality, following several standards such as the ISO 9001 Quality Management System, EN 1090-2 Welding Acceptance, ISO 3834 Welding Management System, and TURQUM Product Conformity standards. We have also integrated ISO 27001 Information Security Management System, ISO 14001 Environmental Management System, and ISO 45001 Occupational Health and Safety Management System standards into our IMS. We have also prioritized institutionalization and environment-friendly production projects, such as improving our family constitution, implementing the AS9100 Aerospace Quality Management System standard requirements, investing in solar energy, and adapting to the digital world. Our company is a family business, spanning three generations, and the family is committed to the company's development and longevity. Every decision made is for the benefit of our company, shareholders, and employees, ensuring that they lead comfortable and happy lives. To demonstrate our commitment, we have revised our family constitution, marking a significant milestone in transferring our company to future generations.

**EXPORT PRODUCTS:**

Hydraulic and Pneumatic Cylinders in Energy – Hydropower Plants, Mobile Hydraulic, Industrial Equipments, Offshore, Cement & Mining, Hydraulic Press, Iron & Steel Industry

Layne Bowler history can be traced back to 1882 when the inventor Mr. M. Layne introduced the first vertical turbine to the world. This was a kind of revolution in the pump industry to get the water out from underground. Today and since 1965, in Ankara, on 42.000 m2 area, Layne Bowler distinguished engineers are working together in smooth and wonderful harmony; from sales to technical, R&D and production departments, all are using the latest technologies such as software, computerized and numerically controlled machines and machine tools to build and sell all kind of pumps. Layne Bowler is producing vertical turbines, submersible and line-shaft deep well pumps, sewage, geothermal, double suction split case, horizontal multistage and norm pumps.

Layne Bowler is manufacturing Engineering Pumps for big capacities and contracting business on turnkey projects basis. We can say also that Layne Bowler is building all kinds of "Tailor Made" Engineering Pumps. The suppliers of such Engineering Pumps are very few in the world; therefore there is no borders or limits for Layne Bowler's market. Today, Layne Bowler is exporting its standard and engineering pumps to Europe, Asia, Australia, Africa and America. Let us Taste the Engineering by choosing Layne Bowler pumps.

**EXPORT PRODUCTS:**

Vertical Turbine Pump, Submersible Pump, Axial Pump, Sewage Pump, Geothermal Pump, Double Suction Split Case Pump, Horizontal Single and Multistage Pump

Sarmak is the realization of an industrialism dream for an idealist, entrepreneur and young engineer educated in Germany. With the knowledge and experience gained in Germany, Turgay Saracoglu became a machinery manufacturer in his hometown. Since 1975, the production facility grew with increasing employment to this day. Sarmak's difference is that we continue to manufacture the highest quality machine with tenacity and passion by ethical principles. Integrity, sincerity and fairness are the common values for our employees. Stability based on trust is the determining factor for our customers and suppliers. Although we are a machinery manufacturer for almost 50 years; we are also an engineering, consulting and service company. We identify the needs of the customers correctly, act quickly and carefully during sales & aftersales. Additionally, we benefit from high technology efficiently and thus renew ourselves continuously.

**EXPORT PRODUCTS:**

Screw Air Compressors, Piston Air Compressors, Compressed Air Dryers, Compressed Air Filters, Compressed Air Tanks, Equipments, Automation Systems, Remote Control Systems
